MBA candidate and supply chain analytics professional with 4+ years across semiconductor logistics, global procurement, automation engineering, and applied AI research. Translates complex operational and research problems into scalable workflows, decision support, and cross-functional execution.

EDUCATION

UNIVERSITY OF CALIFORNIA, RIVERSIDE - SCHOOL OF BUSINESS Sep. 2025 - Jun. 2027

M.B.A. with concentrations in Supply Chain Management and Business Analysis

- Honors: AGSM Professional MBA Merit Scholarship.

NATIONAL DONG HWA UNIVERSITY

Taiwan

M.S. Computer Science and Information Engineering

Sep. 2022 - Jun. 2024

- Honors: Academic Excellence Award; Graduate Student Scholarship.

- Thesis: Quantum logic-enhanced biometric passkey authentication for secure encryption and key generation.

B.S. Computer Science and Information Engineering

Sep. 2018 - Jun. 2022

EXPERIENCE

d-Matrix

Santa Clara, CA

Supply Chain Analyst Intern

Jun. 2026 - Sep. 2026

- Led launch readiness for a centralized cross-border shipment workflow, standardizing master data and operating requirements across international operations.
- Built SQL-enabled shipment visibility and automated exception alerts, replacing repetitive tracking with actionable risk context and recommended next steps.
- Developed Power BI logistics analytics to surface duty, accessorial-cost, and process-optimization opportunities while improving reporting accuracy.
- Piloted computer-vision-assisted serial capture, reducing tested inventory-processing time by 70%+ and improving cycle-count readiness.

Hewlett-Packard Enterprise (HPE)

Taipei, Taiwan

Procurement Operations Analyst II

Jul. 2024 - May 2025

- Managed APAC procurement for high-value server components, aligning suppliers, manufacturing partners, finance, and engineering to maintain availability and production continuity.
- Executed high-volume SAP workflows spanning PO/PR, master data, pricing, forecasts, inventory, and logistics while resolving supply and documentation constraints.
- Supported NPI readiness by translating demand and supplier signals into sourcing priorities, replenishment actions, and alternate material-flow options.

Software Engineer Intern

Jul. 2023 - Jul. 2024

- Automated firmware/software review and test-data transfers with Python, Shell, and Perl, reducing selected recurring cycle times by 90%+.
- Built reusable data pipelines and QA tools used across engineering and manufacturing teams, improving version control, validation readiness, and reporting consistency.

Additional Technical Experience

- Pojen General Hospital - DevOps Engineer Intern (2023): Built Python, C#, and SQL tools for medical-data workflows and supported network and cybersecurity assessment.
- Provision Information Co. - HSM R&D Engineer Intern (2021-2022): Developed C, Java, and Python cryptographic tools and secure key-management documentation for product validation.

RESEARCH, INNOVATION & LEADERSHIP

- INFORMS Revenue Management and Pricing Conference (2026): Presented dynamic pricing and markdown optimization research integrating recurrent quantile forecasting, mean-CVaR optimization, and QUBO-assisted search.
- UCR Graduate Research Symposium (2026): Earned 1st Place Poster for quantum-assisted candidate selection in high-energy lithium battery materials using the Materials Project database.
- Industry-Academia AI Research Assistant - National Taiwan Normal University (NTNU) Industry Project: Coordinated multimodal emotion-recognition research across developers and education stakeholders; supported analysis, technical reporting, infrastructure, and budget controls.
- Selected Publications: DOI-indexed work at ICCE and the UC ORCA Forum on self-regulated learning analytics, a standardized event-window stock-return pipeline, and AI system design for multilingual business-card intelligence.
- Innovation Recognition: USC AI Buildathon (2026) - 1st Place, Benefit to Community Award; Western County of Riverside Regional Fast Pitch Competition (2026) - 2nd Place.
- Google Developer Groups on Campus, UC Riverside - Founder & President: Built a 100+ member AI and software community; delivered 10+ talks and workshops across project management, supply chain, AI, and security.
- UCLA NSF I-Corps Regional Program - Project Lead: Conducted 50+ customer interviews and translated findings into product requirements, market positioning, and commercialization priorities.

SKILLS

- Supply Chain & Business: Procurement Operations, Supply Planning, Inventory, Logistics, Supplier Management, NPI Readiness, Project Management
- Analytics & Engineering: Python, SQL, Power BI, Excel, SAP, R, TypeScript, Shell, Perl, OpenCV
- Research & Decision Methods: Forecasting, Risk-Aware Optimization, Simulation, Statistical Analysis, Machine Learning, Customer Discovery
- Credentials & Languages: Google Project Management Professional Certificate, CITI Program | English, Mandarin, Japanese
